

CUSTOM SOLUTIONS FOR INDUSTRIAL APPLICATIONS

GUZZLER CLASSIC (CL)

Subsidiary of Federal Signal Corporation

INCREASED HAULING CAPACITY

Industrial vacuum loaders are typically designed and built to operate on an industrial site performing cleaning and recovery of material that is either discarded or recycled back into the operation. Rarely is material hauled away for disposal elsewhere. When the need arises to transport material, special features must be incorporated into the industrial vacuum loader in order to gain legal hauling capacity. FS Solutions has designed a system that ensures safe, legal hauling on highway while maintaining the legendary vacuum performance of a Guzzler.

- Rear Inspection Port
- Rear vacuum port, 45 deg. elbow
- 8" air operated relief
- 6" manual knife gate decant
