

SELF-LOADING E-TRACK MINI EXCAVATOR

Electric and remote controlled tracked platform for self-loading Mini Robot Excavators.

The Self-Loading Configuration for the E-Track Mini Excavator is the ideal solution for confined spaces application. The self-loading configuration allows you to pick up and haul materials, then drives backwards to the material discharging point. This configuration allows you to load the dumper mounted on the rear of the machine in a very low space in height with the possibility to automatically discharge the dumper through the remote control.

MACHINE WEIGHT AND DIMENSIONS

Weight	590 [Kg]	1301 [lb]
Height	640 [mm]	25"
Length	1990 [mm]	78"
Width	820 [mm]	32"

SELF-LOADING E-TRACK MINI EXCAVATOR

ADVANTAGES:

- Reach narrow spaces, such as tunnels, sewer pipes and underground canals
- Working at a safe distance, avoiding man entry in confined spaces
- Elimination of dangerous exhaust gases
- No hydraulic or electrical cables
- Low noise levels
- Quick battery charging
- Quick start-up system
