

Vacuum Trucks & Waterblasters

Parts • Repairs • Maintenance • Sales • Rentals • Training

Whatever the problem, we have the solution.

Blower Evaluation and Rebuild

Avoid costly downtime and maximize the life of your blower

- Trained, certified technicians
- Industry leading warranty
- Like-new performance

FS Solutions has over 38 years experience diagnosing and repairing the root cause of blower failures. Whether you are experiencing engine problems or drivetrain issues, we have the expertise to reduce expensive downtime and maximize the life of your machine. Schedule an evaluation today to see how we can put you back on track.

Evaluation includes:

- Disassemble and clean all components
- Thorough inspection by factory trained technicians
- A detailed report and firm price quote

Once you have accepted our quote, your price will not change. Our certified technicians will go to work restoring your blower to like-new performance.

Rebuild includes:

- Internal clearances are restored to their original dimensions
- Impeller tips and ends are machined to manufacturer specifications
- Impellers are precision balanced on our state-of-the-art balancing machine
- New bearings, seals, piston rings, piston ring collars, and fasteners are installed
- One year FS Solutions warranty

All rebuilt blowers are professionally painted, properly packaged and shipped on custom heavy duty skids.
