

GUZZLER®

The Tough You Trust

TAKE A LOAD OFF

**Offloading
Solutions**

More solutions for efficient offloading

No one has more experience than Guzzler in designing offloading solutions to fit customer needs. In fact, Guzzler offers more application-specific offloading systems than any other manufacturer.

Continuous Systems

For simultaneous vacuuming/offloading and less downtime

XCR Swing-Out Loading Cyclone

The XCR offers true continuous production capability. Available on Guzzler Classic. Ideal for catalyst recovery and containment of reclaimed materials like grain, cement, etc.

Sludge Pump Offloading System

If it flows, it goes! The Guzzler Sludge Pump offers reliable power for submersible pumping. Available on most Guzzler models. Ideal for liquids, mud, sewage and other solid-laden sludges.

The Tough You Trust

Batch Systems

Proven power and performance for those times when you must offload later

Dense Phase Offloading System

Combines pressure with airflow to offload dry material up to 120 feet vertically. Available on Guzzler Classic. Ideal for cement or bulk powder applications.

Rotary Vane Pump

Pressurizes debris body at a maximum 14.5 psi to offload liquids and slurries. Available on Guzzler Classic. Ideal for the oil and gas, chemical, industrial waste, grease and septic markets.

Hi-Dump Into Roll-Off Containers

For greater convenience and efficiency, our Hi-Dump system dumps directly into roll-off boxes up to 5 feet high. Available on most Guzzler models.

The Right Solution for Your Needs		Wet Only	Dry Only	Both
Continuous Systems	XCR Swing-Out Loading Cyclone			
	Sludge Pump Offloading System			
Batch Systems	Dense Phase Offloading System			
	Rotary Vane Pump			
	Hi-Dump Into Roll-Off Containers
