STRAIGHT VAC SERIES

The Westech Straight-Vac is the ideal cleaning machine. This Straight-Vac truck unit is built to provide similar service to a Hydrovac, but with additional hauling capacity. This popular configuration is designed to maximize volume of material while optimizing legal hauling capacity. Often utilized for large volume projects to allow more on-time production with fewer disposal trips. Available in a number of customizable configuration this unit conforms to Transport Canada 407 hazardous waste hauling regulations and is also available in non-code.

Straight vacuum units are single compartment units designed for large volume transfers. Can be used in combination and support of a Combination vac or Hydrovac unit on large jobs. A great add-on for a growing vacuum services company.

AVAILABLE AS: TRIAXLE PUP, TANDEM/TRI AND TRI/TRI

THE *WESTECH* ADVANTAGE

MORE PAYLOAD

Each unit is engineered using our 3D modeling & weight distribution programs to optimize each customer's build - maximizing the legal payload capacity. Our goal is to efficiently use as much axle capacity as possible while keeping the design safe and productive, resulting in more time on the job and fewer overweight penalties.

BUILT FOR THE HARSHTEST CONDITIONS

Westech units have been operating in some of the harshest environments for over 30 years. We've learned how to build equipment that will thrive in these conditions, offering a variety of different features such as heated compartments, heated valves, heated water lines, to meet all climate conditions.
