TRAILER VAC SERIES

THE **WESTECH** ADVANTAGE

MORE PAYLOAD

Each unit is engineered using our 3D modeling & weight distribution programs to optimize each customer's build - maximizing the legal payload capacity. Our goal is to efficiently use as much axle capacity as possible while keeping the design safe and productive, resulting in more time on the job and fewer overweight penalties.

BUILT FOR THE HARSHTEST CONDITIONS

Westech units have been operating in some of the harshest environments for over 30 years. We've learned how to build equipment that will thrive in these conditions, offering a variety of different features such as heated compartments, heated valves, heated water lines, to meet all climate conditions.

This popular configuration is designed to maximize hauling capacity and transfer large volumes of payload. Often connected to other onsite vac-units to increase payload and jobsite operational capacity. Available in a number of customizable configurations, the most versatile units are designed as TC407 hazardous waste hauling units. Also available in non-code.

Available in 3 Configurations:

- Tridem Axle Pup Trailer – 97 BBL Capacity
- Tandem Tractor w/Tridem Trailer – 140 BBL Capacity
- Tridrive Tractor w/Tridem Trailer – 197 BBL capacity

STANDARD FEATURES

- 28" Hg Vacuum System (excludes Pup)
- 6" Diameter Vacuum System
- Hydraulically Raising Offload
- Industrial Grade Controls
- Heated Transport Compliant Rear Door Discharge and Suction Valves
- Diesel Blower Flush System (excludes Pup)
- Body Vibrator
- Toolbox
- Work Lights

POPULAR OPTIONS

- Linex Exterior Coatings
- Epoxy Internal Coating
- Upgraded NVE Suction and Discharge Valves

INDUSTRY APPLICATIONS

- Tank Cleaning
- Rig Work
- Fluid Hauling
- Environmental Cleanup
- Transfer of Oilfield Wastes.

AVAILABLE AS: SINGLE AXLE, DOUBLE AXLE, TRI-DRIVE AND TRAILER MOUNTED UNITS
