Virtual National Training Institute
Technical Group

The T Group (or Technical Program) has a mix of informative and interactive sessions for any vNTI participant. These 1 ½-hour sessions will feature presenters from the industry covering topics like:

- Updates to the NEC® and associated training content
- Clarifications and communications on worker safety and the NFPA 70E®
- Explanations from the authors on Grounding and Bonding and Code Calculations
- Fundamental aspects of the LMS and curriculum planning tools like the CLCS

Also, interactive sessions are planned regarding:

- Conduit Level II Labs and Calculations in support of AC Theory Trig
- The PLR and Instrumentation Desktop Trainers
- Transformer Simulation use for the Inside and the Outside Simulator
- The *new* Motor Control Simulator on what it is and how to use it
- The Electrical Theory Simulator for use in training on AC and DC Theory

Our Training Partners have also stepped up again and will be contributing to many different and interesting topics as well.

The overall list of available technical sessions is designed to support all attendees in finding information, knowledge, and skills related to their job. Be sure to review the entire NTI Information Booklet linked below to see all of what the T Group program has to offer for vNTI 2020.

- Register for NTI at https://electricaltrainingevents.org
  - o If you do not remember your log-in information, simply go to the site and click Sign In located in the top right corner. After that, select the Forgot Password link and enter your email address. An email will be sent to you with a link to reset your password.

- The NTI Information Booklet is available online at https://bit.ly/vNTI_2020_InfoBooklet

- For more information visit our NTI website at http://nti.electricaltrainingevents.org

We look forward to seeing you at the vNTI!
