

Why should you attend the 2021 NECA Safety Leadership Summit?

Stay informed and prepared

The NECA Safety Leadership Summit offers decision-makers the chance to hear from industry leading speakers in Safety, Leadership, Risk Management and Mental Health—and take these lessons back to their company. The Summit will feature the latest update on legal concerns over proposed regulations and the recent administration actions that affect employers and employees in the construction and electrical industries.

Connect with industry safety leaders

Bringing people together is one of the greatest parts of any NECA event, and this is true of the NECA Safety Leadership Summit. Networking with your safety peers and other safety professionals can reinvigorate your passion for keeping workers safe. The many vendors in attendance will connect you with the latest innovative approaches in safety products and technology.

Become a better safety leader

At the NECA Safety Leadership Summit, you will learn the latest leadership principles and techniques to help you keep workers safe and influence positive safety behavior on the job. Learn to be an effective Safety Leader from John Drebing, hear the latest OSHA updates from Eric Conn—including a spotlight on the OSHA emergency temporary standard—and find out why cybersecurity is such a big issue for everyone, especially employers in the construction industry today.

Creating a culture of safety throughout the industry

Understanding the risks that construction employers are faced with today is key to every company's success. Identifying, controlling, and mitigating those risks is a full-time endeavor for everyone in an organization. At the NECA Safety Leadership Summit, learn about the risks—seen and unseen—that employers are facing every day. Discover the solutions that will enable you to minimize those risks.

The NECA Safety Leadership Summit will be held Nov. 1–3 in Chicago, Illinois. If you are an executive or safety leader in your company, you cannot afford to miss this event.
