EASY OFFSHORE ROAMING WITH GIGSKY

Offshore Coverage with the Tap of a Button

We partnered with global data provider GigSky to bring you commitment-free, individual data plans for the Gulf of Mexico and the North Sea.

It's simple. If you own one of the latest eSIM-compatible smartphones (iOS, Android, Windows) - download the GigSky app, select a plan, and you'll connect in minutes - no physical SIM card required. Perfect for offshore workers who want to purchase data on their own terms, or anyone else who simply needs a bit of data at sea.

Constantly Expanding

We are proud of our communication network of fibre cables, radio links and 4G, providing so many with high-capacity, resilient and low-latency connectivity. But we are always looking to improve. Our goal is to always be the preferred offshore network provider, and we are constantly expanding our infrastructure and improving our capacity.

Raising the Standard

WHAT IS AN eSIM?

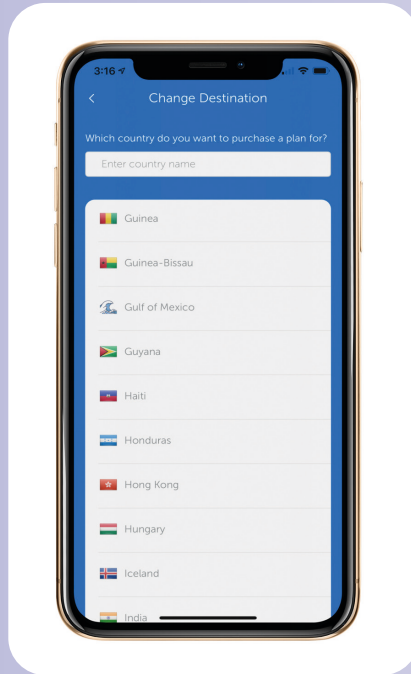

- Embedded SIM, built straight into the device
- Install eSIM and plan directly from the GigSky app or in settings menu with your iPad
- Eliminates 'SIM swapping' & gives users more control and choice when selecting mobile services
- Built into many of the latest smartphones and tablets, check our website for further information
- The gigsky app and service is compatible with most smartphones, however some operator locked devices will not be able to use the service. Please refer to GigSky's support / FAQ resources for additional information; <https://support.gigsky.com/hc/en-us>

iPads are preinstalled to acquire data plans – which can be activated in settings menu

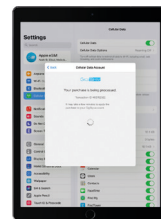

Go to Settings > Cellular/Mobile > Select GigSky > [do not select Other]

Select Continue >

Select Country of Residence > [your home country not your destination]

Select buy now for the offshore data plan you wish to purchase [Gulf of Mexico or North Sea] > connect

Smartphones activate plans via downloadable GigSky app

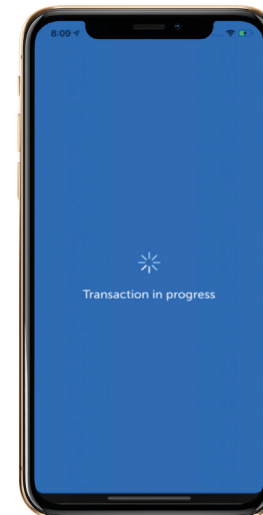

Go to the App Store and download the GigSky app >

Select Allow to let the GigSky app send notifications [this is required to send you information when your data plan is running low] >

Search the destination where you would like to purchase a data plan [Gulf of Mexico or North Sea] >

Select the data plan you wish to purchase > connect!
