

Natura™ products—  
aluminum, inspired by nature;  
Natura™ is aluminum that looks like wood.

From a distance of five feet, Natura looks just like a fine piece of wood that has been carefully crafted and hand finished into all products. The finish is deep and rich. From one foot, you notice the intricate pattern of the grain. The warmth of the wood finish really shows through. Only when you touch Natura is the secret revealed, **solid as a piece of aluminum.**

Natura utilizes a finish process that is applied directly to the metal, then baked on to make it durable and virtually maintenance free.

Now you can have the best of both materials. The warmth and beautiful look of wood with the strength and durability you expect from aluminum. And it's available in eight different wood finishes. The **perfect solution for interior and protected exterior applications.**

For more information on how Natura can meet or exceed your design ideas, call 1-866-OLDCASTLE (653-2278) or visit [oldcastlebe.com](http://oldcastlebe.com)
