

iCOMPLEAT

Seamlessly Integrate with Sage Intacct
The missing piece to your
accounting software investment

Increase productivity and reduce spend with iCompleat Buy to Pay

iCompleat is an AI and machine learning powered software developed by Compleat Software to automate the accounts payable process, and unify the company purchasing process.

This application has combined industry accounts payable best practices and cutting-edge technology to provide customers an average rate of 12% for savings on indirect spend, up to 90% productivity gains, 100% visibility of all POs, invoices, and real-time cash requirement reporting.

Real-time integration with Sage Intacct

Seamlessly connect Sage Intacct with iCompleat in minutes! iCompleat synchronizes accounting data to the Sage Intacct including real-time approved invoice postings, so you don't have to configure multiple entities, and you can see all locations, suppliers, GL codes, and live payment statuses from your accounting system and all invoice data from iCompleat.

iCompleat is fully compatible with BTERrell SmartEFT™, which enables Sage Intacct users to securely pay the vendors and send electronic funds from any bank to anywhere in the world.

sage Intacct

90% less manual processes

- Zero-touch AP process automation
- AI powered invoice data capture, extraction and coding by supplier and line item
- Full visibility of every invoice and payment status
- Automated invoice and PO matching

Smart and fuss-free approvals

- Simple drag and drop workflow creation
- Enterprise grade simultaneous approval routing
- Unlimited approval workflows, hierarchies and approval groups
- Dedicated mobile app for approvals on the go

Gain visibility and control of your purchasing

- Digitize your company's purchasing process and make significant savings
- Create POs for approvals within a selected supplier list to control spend
- Have real-time visibility of all invoices, approval and payment statuses
- Enjoy fully automated accruals and real-time cash

Security first

- Remove risk of invoice fraud completely
- Multiple level data validation ensures correct payment information and stops duplicates
- iCompleat is deployed on Microsoft Azure local shards adopting UK, USA and Australian local data protection and tax requirements automatically

Advanced data capture

Pricing

iCompleat utilizes advanced AI and machine learning in purchase invoice capture and process automation, allowing it to be incredibly competitively priced.

Customers often cover the license cost from the savings incurred by adopting a unified digital purchase process.

Contact us and we will assist in choosing the best pricing plan for your business. We will assess the volume and complexity of invoices received, users involved, and the company's spending habits. Our experts will make sure your monthly or annual subscription payment is the most suitable to fit your organization's needs.

Sign up for a personalized demo today!

Arrange a no-obligation product demonstration with one of our experts and tell us about your current accounts payable and buying procedures. Together we'll craft the right plan to transform your accounting automation processes. You will get to know the functionality in detail and have any of your questions answered.
