

Positive Venture Group Services

Positive Venture Group is a finance outsource company focused on supporting growth stage businesses on an as-needed, on-demand basis.

We achieve and accelerate results by providing providing the talent, tools, processes, and funding services necessary to fast track our client's goals. We work side by side with our clients, enabling them to reach their full potential.

WHAT DO WE OFFER?

CFO SERVICES

Many high-growth startups fail because daily tactical distractions inhibit their growth. They don't have the time or insights to execute strategically. To make matters worse, these growing, transforming companies typically believe that they can't afford, attract, or retain the senior finance talent required to reach the organization's full potential.

Positive Venture Group embeds experienced CFOs on a part-time basis. Positive CFOs deliver robust and mature processes to stabilize finances, enable board and governance requirements, attract funding, and increase growth.

FUNDING SERVICES

Every company needs funding, regardless of size or stage. Accessing the funding required to grow your business can be one of the most onerous and distracting endeavors a growing company faces. The Positive team has a proven track record in identifying and securing equity investment, debt and non-dilutive funding.

Positive helps you get your business ready to qualify for and expedite funding. Regardless of the source of funding, Positive will help you secure the capital necessary for success.

FINANCE AS A SERVICE

Positive has a dedicated staff of controllers, accountants and analysts ready to manage your entire finance operation. By outsourcing this function to our PVGroup, you are free to concentrate on creating a great product while driving company growth.

Enabled by NetSuite, the world's #1 web-based integrated business software, Positive is Canada's first NetSuite business process outsource partner. The cost-effective combination of proven technology, expertise, and best-in-class processes provide you the trusted business insights necessary to succeed.

NETSUITE

NetSuite is a cloud-based ERP platform that is built with scalability in mind. It allows you to manage all of your fundamental back-office operations and business processes from one secure and accessible network. We leverage Oracle NetSuite in order to provide your business with a platform that is built to support growth at every stage.

Transform your business onto a single, unified, cloud-based solution that will accelerate your order-to-cash process, eliminate any manual reentry of data and reduce your TCO.
