

## CANADIAN SPHAGNUM **PEAT MOSS**

FOR ALL ACID LOVING PLANTS

### **BLENDS:**

Coarse Canadian Sphagnum Peat Moss

### **SIZE OPTIONS:**

- .5 CU (120 bags per pallet)
- 2 CU (52 bags per pallet)

### **BENEFITS:**

- Excellent soil conditioner due to high organic content
- In clay soils, peat moss will aggregate soil particles to give better aeration and drainage
- In sandy soils, high water-holding capacity will help to retain moisture and nutrients, especially during hot summer months
- Sustainably harvested

### **BEST USE:**

Plant lovers, we have something special for you! If your garden is full of clay or sandy soil, peat moss will aggregate soil particles for better aeration and drainage. Peat Moss is one of those soil amendments that can support flowering plants such as azaleas, camellias, gardenias and other acid-loving plants. Peat Moss has no pathogens, bugs, bacteria, or weed seeds. Surprisingly you can find it in swampy, waterlogged areas primarily located in the Northern Hemisphere - making Peat Moss a delicacy for garden plants. Peat Moss does not compact or breakdown right away, so all you need is one application that will last several years.

### **APPLICATION USAGE:**

.5 CF will fill 2-4 4" plants or 1 (1) gallon plant

2 CF will fill 3-5 (1) gallon plants, 2-3 (2) gallon plants, or 1 (5) gallon plant
