# Mobile Credential

**OPEN OPTIONS®**
ACCESS TECHNOLOGY

## ACTID
By Open Options

## Features

• Easy enrollment for users
• Supports NFC for Android and BLE for iOS
• Fast transaction times of less than 1 second
• Complete user privacy
• All data is stored in separate secure element
• Free download and usage
• Easily syncs with DNA Fusion

## Technical Features

• Hardware Requirements: Android devices with NFC and iPhone 6 and later
• Available for iOS 10 and later and Android Marshmallow 6.0 and later
• The credential is 32 bit unique number
*(no parity bits)*
• Hold-to-reader mimics proximity card
*(short read range)*
• Compatible with DNA Fusion 7.8 and later
• Compatible Wavelynx Ethos Readers:
*(firmware versions 2.4.2 and later)*
      • Mullion (ET10-6, ET10-7)
      • Single Gang (ET20-6, ET20-7)
      • Keypad (ET25-6, ET25-7)

## Overview

ACT ID, by Open Options, is an elegantly simple mobile application. ACT ID stores your unique ID and communicates it securely to DNA Fusion for authentication. ACT ID features zero-touch, cloud-issued credentials for direct enrollment into DNA Fusion.

During enrollment, users will be prompted to input their cell phone number. ACT ID then sends a verification code to the user's phone. After verification, the credential is ready to use. DNA Fusion syncs nightly with ACT ID, ensuring any new devices added (with the same cell phone number) are updated seamlessly.

## Tips

• Hold phone within 1 inch of the reader
• Some phone cases may interfere with communication—remove case when troubleshooting
• On Android, ensure the screen is illuminated (device does not need to be unlocked)
• Ensure NFC is enabled on Android and BLE is enabled on iOS
