LLOYD'S OF LONDON

YOURmeds™ helps you to take your medication on time, it is as easy as opening an advent calendar.

What you have to do

When it is time to take your medication, the smart pack will beep an alarm three times, a red light will flash and the screen will show a number. Simply push open the “door” with the same number displayed on the screen and take the medicine inside.

How you will get your medicines

The pharmacist will deliver the pack to you every week so that it is ready to use. They will take away the old pack.

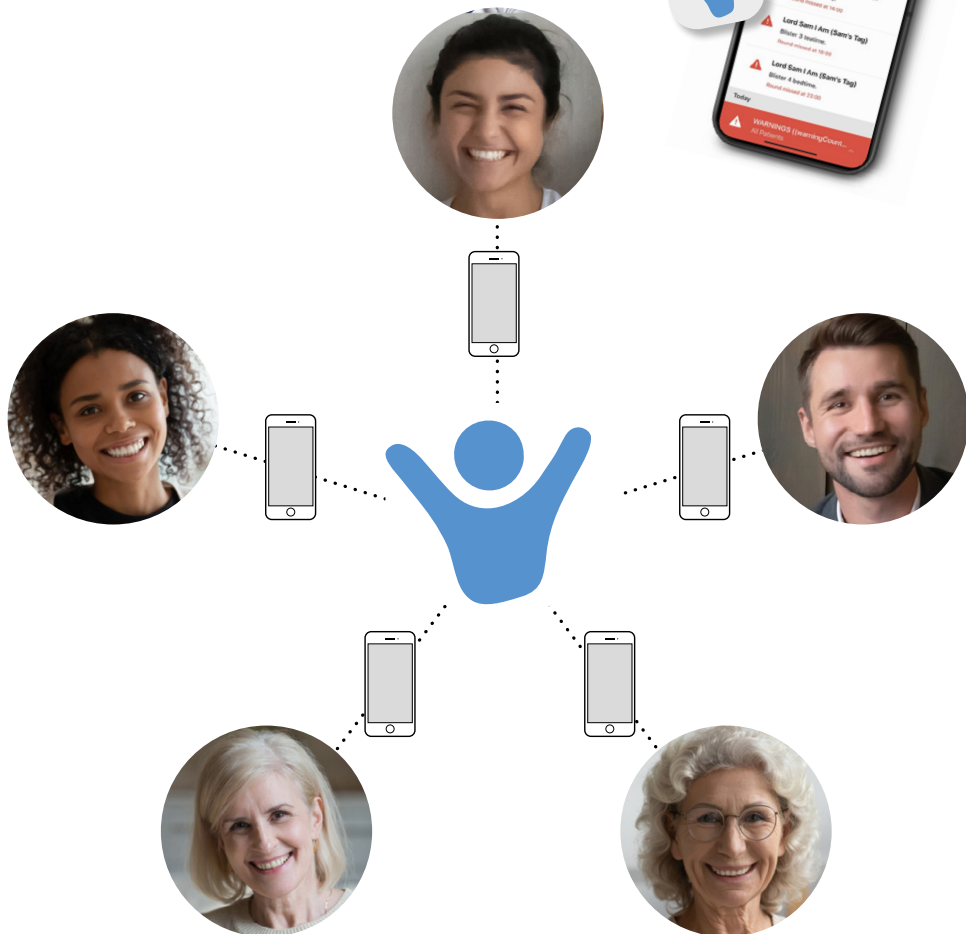

What happens if you forget

You can choose up to five people to support you with your medication. If you haven't taken your medication after 10 minutes of the initial alarm, the tag will inform the first supporter on your list to give you a quick call to remind you to take your medication. A new supporter is informed every 10 minutes. Once you take your medication the supporters will stop being informed.

The YOURmeds™ Tag will indicate which numbered dose you need to take

You can ask up to five family members or friends to support you to take your medication. We will ask you for their email address and telephone number to set them up as a supporter. Each supporter will download the App from the App Store or Google Playstore.

Each supporter is given a unique login to the app where they will be able to see when you need to take your medication. They will be able to phone you directly through the app if you miss your medication, take the wrong medication or take too many.
