

# BESPOKE & INTEGRATION PRACTICE LEAD

Role type: Permanent

Location: Birmingham/Work from home with occasional customer visits

Salary: Competitive

## Role Overview

The Bespoke & Integration Practice Lead is primarily responsible for leading the efficient and accurate design and development of end to end software solutions, using the full Microsoft stack, specialising in C#.NET web applications and Azure integration technologies. These solutions will meet the business, service level and software architecture needs of the client in a cost effective manner.

It is also the responsibility of the Bespoke & Integration Practice Lead to assist the support and development teams in compliance with the departmental policies and standards by following best practice approaches to analysis, design, coding, testing, configuration management, change management and environment management.

The Bespoke & Integration Practice Lead will be a .NET expert and will act as a sounding board and mentor to their team and other staff within the Solutions department.

## Main Duties and Responsibilities

- To provide full project lifecycle (Design & Analysis/Development/Testing/Implementation) technical support and assistance to colleagues and clients in the delivery of IT solutions and documentation.
- To be an expert user in supported applications and to maintain this level of understanding and knowledge.
- Responsible for the Practice's adherence to policies and best practice relating to;
  - Software design and architecture
  - Software configuration & release management
  - Software testing/Quality control
  - Technical documentation
- Technical mentor for colleagues
- Provide Project Management, Business Analyst and Team lead experience as required.
- Have a good understanding of current technologies and keep abreast of future enhancements e.g. Cloud hosted web applications and integration in Azure/Amazon etc.
