

NEW Water, the brand of the Green Bay Metropolitan Sewerage District, is building on the success of the Silver Creek Pilot Project by starting an agricultural cost share program in the Ashwaubenon & Dutchman Creeks Watersheds. This Program encompasses nearly 40,000 acres and focuses on improving water quality through partnerships and collaboration.

As a stakeholder in this region, you have many opportunities to partner with the Program to implement best management practices (BMPs) that will enhance your agricultural activities while helping improve water quality in the region.

This brochure outlines the types of funds payable to cost share recipients upon implementing and maintaining BMPs as outlined in the cost share agreement.

2020 COST
SHARE FUNDING

COVER CROP

\$20 - \$65/ACRE

Corn Silage: \$20/acre for planting; plant winter wheat, rye, triticale or clover, add \$25/acre

- 10% cover establishment: increased planting payment to \$30/acre
- 20% cover establishment: increased planting payment to \$40/acre

Soybeans or HM Corn: \$35/acre for planting; plant winter wheat, rye, triticale or clover, add \$25/acre

- 10% cover establishment: increased planting payment to \$40/acre

Corn Grain: \$40/acre for planting; plant winter wheat, rye, triticale or clover, add \$25/acre

NOTE: To qualify as a cover crop, wheat and rye must be terminated prior to boot stage.

Winter Rye after
Corn Silage / 30% cover
\$65/acre

Winter Rye after
Corn Silage / 10% cover
\$55/acre

Winter Wheat after
Soybean / 60% cover
\$65/acre

Winter Rye after
Corn Grain / 10% cover
\$65/acre

Watershed Field Coordinator will measure
cover crop establishment after planting.

INTERSEEDING

\$50 - \$75/ACRE

\$50/acre for planting (using available equipment)

\$75/acre for winter wheat, rye, triticale or clover

Aerial seeding Winter
Rye after
Corn Silage:
\$75/acre

Broadcast
Orchardgrass after
planting Corn Grain:
\$75/acre

Cover Crop after
Interseeding
Corn Silage:
\$75/acre

Contact Nick Peltier, Brown County Land Conservation Department,
for information on available equipment at (920) 284-9349.

Watershed Field Coordinator must approve
seed mix and planting time prior to seeding.

ALFALFA WITH GRASS

\$40/ACRE

Benefits of Alfalfa with grass:

Planted when established or added later

- More persistent crop through the winter
- Creates weed and erosion control

Watershed Field Coordinator must
verify after establishment.

LOW DISTURBANCE MANURE APPLICATION

\$26/ACRE

The goal of low disturbance manure application (LDMA) is to
minimize the physical disturbance of the soil.

For more information on LDMA and available equipment, please
contact Andy Kiefer, Outagamie County Land Conservation
Department at (920) 574-7539 or Nick Peltier, Brown County
Land Conservation Department at (920) 284-9349.

Watershed Field Coordinator must
verify after manure application.

RESIDUE / TILLAGE MANAGEMENT

\$15 - \$20/ACRE

Following Corn Grain Harvest:

- 50% residue OR no-till: \$15/acre
- 60% residue AND no-till: \$16/acre
- 70% residue AND no-till: \$18/acre
- 80% residue AND no-till: \$20/acre

Following Other Crops Harvested:

- 30% residue OR no-till: \$15/acre
- 40% residue AND no-till: \$16/acre
- 50% residue AND no-till: \$18/acre
- 60% residue AND no-till: \$20/acre

Watershed Field Coordinator will measure
residue and verify in spring after planting.
