

## Cedar Grange, Wolverhampton

Cedar Grange is a purpose-built residential care home in Wolverhampton, specialising in 24-hour residential care for elderly people. We pride ourselves in being dementia specialists through years of experience which is used alongside the latest training.

### Have incidences of falls decreased since the introduction of RITA?

Yes! Specifically, we have a Punjabi speaking gentleman who enjoys listening to the Punjabi music at night. Not only does this settle and calm him down, it reduces his risk of falling.

Due to him having a more settled night sleep and getting into a regular sleep pattern, this stops him getting up in the night.

### Has medication, PRN's reduced for residents since the RITA system has been used?

Yes! When the residents use RITA, they're positively stimulated and distracted. So much so that when they don't feel the need to ask for painkillers when they normally would do.

Our residents are too pre-occupied listening to music and scrolling through the many options that RITA offers them.

### Has the number of challenging behaviours reduced since the RITA system was introduced?

Yes! One of the best examples is how RITA brings everyone together. They all enjoy listening to the music and playing games in group activities. This prevents our residents becoming bored and agitated which can then lead to challenging and escalated behaviour.

Due to the functionality of RITA being so user-friendly and easy, our residents can use this device by themselves and access the content that they enjoy.

### Manager Comment:

All in all, RITA is a very good piece of equipment to entertain and keep our residents occupied and motivated.
