Unlock The Agile Workspace

Helping public sector organisations communicate faster and smarter to improve citizen services.

Amid growing demand for services and shrinking budgets, public sector organisations face significant pressures to do more with less, resulting in a marked shift in frontline services.

Despite these challenges, there is a clear desire and willingness within the public sector to deliver citizen-centric services that improve lives and make communities stronger.

Digital technology can help improve resident interactions, support collaboration with colleagues and partners and deliver high quality experiences for communities at lower cost.

Six Degrees delivers 8x8 X Series and its other cloud communication solutions to the public sector via the Network Services 2, RM3808 Framework.

UCaaS Solutions for:

- **Central government**
  - Provide efficient citizen-centric services to an ever more demanding population.

- **Local councils**
  - Deliver cost-effective public services and build stronger communities.

- **Policing**
  - Enable critical collaboration wherever frontline police officers are based.

- **Housing associations**
  - Facilitate better experiences for tenants as demand grows.

- **Health and social care**
  - Offer high quality care and improve patients’ lives while managing costs.
### Integrated cloud communications

Modernising your communications by moving to the cloud is the first step in the digital transformation journey. A single solution that brings together voice, video, chat and contact centre in the cloud facilitates new working practices and changes in staff culture, giving public sector employees the tools needed to work together creatively to find new solutions that make lives better, for less.

### The Agile Workspace

Solutions that combine communications, collaboration and contact centre solutions in the cloud, helping public sector organisations deliver modern experiences to citizens and employees.
