Secure Hybrid Cloud Transition

Secure, compliant UK-sovereign hybrid cloud services
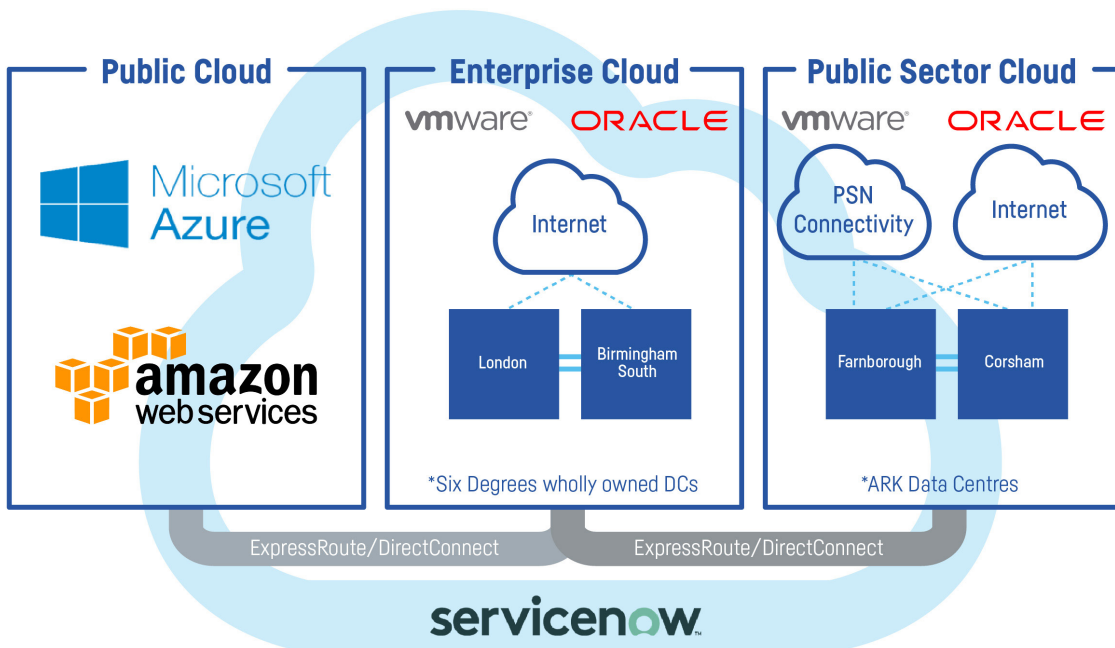

6° Six Degrees

Contact your Account Manager or email **brilliance@6dg.co.uk**

Available to purchase through G-Cloud

Six Degrees delivers **true hybrid cloud** to the UK public sector, enabling organisations to host legacy on-premises applications in our Enterprise or Public Sector Cloud whilst migrating 'ready to go' applications to the public cloud.

Six Degrees' Enterprise and Public Sector Clouds are protected by **24x7 security information and event management** (SIEM) **managed through a UK onshore cyber security operations centre** (CSOC).
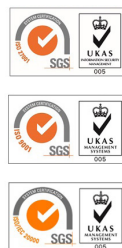

With **operating system and database managed services** offered on any platform, and a **full range of consultancy assessments** available across our entire end-to-end service portfolio, Six Degrees' UK Government-approved technology solutions power the digital transformation agenda for organisations throughout the UK public sector.

Capture and consult

We don't believe that any cloud is 'one size fits all'. We analyse your workloads and help define your cloud strategy, creating a cloud migration plan that will help you achieve optimal performance, cost and security.

Transform and harden

We transition your cloud-ready workloads using Six Degrees and cloud industry best-practices, ensuring your cloud adoption minimises risk and enhances security throughout.

Manage and secure

A healthy, performant cloud infrastructure requires constant upkeep. We deliver round-the-clock governance and alerting to maximise uptime whilst keeping your workloads running efficiently and cost-effectively.

Continually optimise

What's right for your workloads on day one may not still be right on day 100. We ensure that your cloud workloads are always running to the highest levels of security, uptime and performance through continual assessment and optimisation.
