# Secure Microsoft 365
Secure your Microsoft 365 estate.

Contact your Account Manager or email **brilliance@6dg.co.uk**

Your organisation's exposure to human error, the cause of 90% of data breaches, increases as you mobilise large numbers of remote workers. By utilising the security tools available through Microsoft 365 your organisation will minimise the risk of human error resulting in data breach. Microsoft Azure Sentinel enables you to identify and address threats, with SIEM reinvented for a modern world. Six Degrees will enable your organisation to **utilise the right Microsoft 365 plan to match your security and compliance requirements.** We will then **implement Azure Sentinel** throughout your estate, and **manage threat detection and response through our 24x7 Cyber Security Operations Centre** [CSOC].

How do we ensure our Microsoft 365 plan includes the cyber security features we need?

Our Microsoft and cyber security specialists will consult and collaborate to get you on the right plan.

We need 24x7 monitoring of our Microsoft estate to protect our organisation from cyber threats.

We will implement the cloud-native Azure Sentinel across your Microsoft 365 estate.

We lack the security skills and resources to manage the alerts a SIEM service will create.

Our CSOC is staffed by experienced, highly accredited cyber security professionals.

We need to protect our Microsoft 365 estate 24x7, not just during office hours.

The CSOC is active 24x7x365, ensuring alerts are acted on promptly at all times.

We are concerned about the sovereignty of our data.

The CSOC is based at a secret UK onshore location, ensuring your data remains in the UK.

We need to achieve cost efficiencies whilst securing our IT infrastructure.

With Azure Sentinel you pay nothing extra when you ingest data from Microsoft 365 audit logs.

Your Secure Microsoft 365 Journey

Consult	Implement	Defend and Recover
Microsoft and cyber security specialists will consult with you and recommend the best Microsoft 365 plan to meet your security and compliance requirements.	Our specialists will work with you to implement all the required security and compliance features of Microsoft 365 to meet your specific needs. Additionally, our cyber security specialists will implement monitoring to ensure you maintain your compliance and security posture.	We will manage threat detection and response through our 24x7x365 Cyber Security Operations Centre. If you do become compromised in any way, our security experts can help you recover control of your data.
