

ACTIVE DIRECTORY MANAGEMENT SERVICE

Identity services are a critical part of hybrid cloud services. Our Active Directory (AD) Management service ensures your core AD-based identity services are monitored and supported proactively.

The Active Directory (AD) Management service provides proactive monitoring of Active Directory and DNS services within your infrastructure. Options are available for AD audits, continuous auditing, and Active Directory Federation Services (ADFS) management.

Active Directory Management Service Benefits

Ensures your Active Directory service is fully operational at all times.

AD audits highlight stale objects which could compromise your organisation's security.

Continuous auditing supports compliance with PCI DSS and FCA requirements.

Active Directory Management Service Features

Continuous Monitoring

Our proactive AD management service ensures your hybrid cloud identity infrastructure is monitored continuously.

Identify and Resolve Issues Proactively

Through proactive AD and DNS monitoring, any potential issues within your identity infrastructure are identified and resolved before they impact your organisation.

Best Practice Design Improvements

Optional annual AD audits provide recommendations for improvements in your AD design, ensuring alignment to industry best practices.

Enhanced Security Monitoring

Optional continuous auditing can be integrated with a SIEM solution to provide enhanced security monitoring and alerting of any identity compromises.
