

# AZURE VMWARE SOLUTION

Modernise your applications with Azure-native services by moving VMware-based workloads seamlessly from your data centre to Azure, all while continuing to use the VMware tools you already know.

Do you want to take advantage of feature-rich Azure services? Do you feel that your existing VMware investments, skills and tools are holding you back?

The Azure VMware Solution service enables you to deploy VMware on Microsoft's Azure platform, allowing you to continue to use your existing VMware skills to manage your environment while taking advantage of Azure PaaS services – giving you the best of both worlds.

## Azure VMware Solution Service Benefits

Maintain operational consistency with familiar technology including vSphere, vCenter, HCX, NSX and vSAN.

A comprehensive VMware environment on dedicated Azure infrastructure, built by Microsoft and VMware.

Runs your VMware workloads natively on Azure, supported and operated by Microsoft.

Allows you to manage and secure applications across both VMware environments and Microsoft Azure within a consistent operating framework.

## Azure VMware Solution Service Features

Get scale, automation and fast provisioning for your VMware workloads on global Azure infrastructure.

Modernise your VMware workloads with native Azure management, security and services.

Take advantage of Azure as the best cloud for your Microsoft Windows and SQL Server workloads.

Move your VMware workloads to Azure easily and increase your productivity with elasticity, scale and fast provisioning cycles.

Get on-demand access to additional capacity when you consolidate, retire or expand existing data centres.

Rely on the operating platform and backend infrastructure of Azure to run VMware vSphere, vSAN and NSX-T platforms natively and at scale.
