CITRIX VIRTUAL APPS AND DESKTOPS MANAGED SERVICE

Manage, control and monitor your virtual desktop infrastructure.
Beyond Cloud.

Our Citrix Virtual Apps and Desktops (CVAD) Managed Service streamlines operations, reduces infrastructure costs, and delivers secure user experiences across your virtual desktop and application environments with Six Degrees.

CVAD perfectly complements our Azure Virtual Desktop (AVD) service and, together, they simplify cloud transformation and speed up adoption of digital workspaces to enable greater agility, productivity, and security.

Benefits of Pairing CVAD with AVD

Feature	Overview
Performance and security analytics	Targeted specifically at app and desktop virtualisation, our analytics tools give administrators deep visibility into user behaviour and session responsiveness. This gives IT the power to catch small issues before they become big ones.
Advanced monitoring	Admin and helpdesk tools built for enterprise scale. Monitor site and session health, track user sessions, diagnose issues, and more.
Workspace environment management	Optimise user density and logon performance with a suite of technologies targeted to improve user experience while maximising the value of IT spend.
AutoScale	Scale your environment up or out based on schedule or load. Make the best use of your existing data centre investment and ramp sessions into the cloud as needed. Scale cloud workloads dynamically on demand.
Hybrid cloud management	CVAD provides a single management interface for Citrix workloads, on-premises or in Azure (Windows 10 and 11 Enterprise only). Migrate, capacity burst, or load balance between data centre and cloud.

Beyond Cloud

Session recording	Access full record and playback of user sessions for issue diagnosis, compliance, or security audits.
Citrix provisioning	Tools that simplify administration and enhance environment reliability. Rapidly deploy environments of any scale.
Citrix HDX technology	Our leading-edge protocol delivers user experiences on any device, over any connection. Leverage built-in optimisations for interactive multimedia performance for Microsoft Teams, Skype, and industry-standard telework apps.
Citrix app protection and watermarking	Protect your environment from accidental or malicious data leakage.
Citrix app layering	Flexible OS, application, and user layer technology enables an enhanced user experience while leveraging nonpersistent environments.
