

AZURE VIRTUAL DESKTOP

Empower your teams with seamless access to tools that enable them to work productively **Beyond Cloud.**

Six Degrees Azure Virtual Desktop provides a managed desktop and virtualisation service that runs on Microsoft Azure cloud, enabling your organisation to become more resilient, empower employee productivity, and scale to your requirements.

The service includes the deployment, configuration and management of your Azure Virtual Desktop platform. As standard, we will install the most commonly required third-party applications including Microsoft 365 Apps (Outlook, Word, Excel, PowerPoint, Publisher, OneDrive and Teams), browsers (Microsoft Edge, Google Chrome and Firefox) and Adobe Reader on to your Azure Virtual Desktop gold image.

Azure Virtual Desktop Benefits

Provide an enhanced user experience and boost user productivity with access to all tools, apps and desktop services they need from any device, anywhere, at any time.

Optimise infrastructure costs by only paying for the virtual machines and storage that are required.

Meet compliance requirements and ensure secure network access with reliable and controlled access with trusted Azure security, governance and regulation.

Protect your organisation through built-in Azure security capabilities.

Keep business applications and user data secure and compliant through built-in end-to-end security capabilities that are integrated with the security and management of Microsoft 365. The Six Degrees anti-virus tool offers protection against advanced threats, ransomware and real-time phishing.

Simplify the deployment and management of your infrastructure.

By leveraging Microsoft Azure for your Azure Virtual Desktop, Six Degrees enables your organisation to scale your environment quickly in response to your business requirements, ensuring you only pay for what you use, when you use it. Monthly security updates will be applied automatically to your Azure Virtual Desktop operating system, ensuring you are protected from the latest known threats.

Free your IT team to focus on core business objectives.

Reduce the need for hardware inventory and maintenance to free your teams to focus on users, apps and day-to-day business requirements. The Six Degrees experts will monitor your environment and investigate any alerts, ensuring a seamless experience for your users.

Optimise costs and modernise your infrastructure.

Save on monthly compute costs and reduce infrastructure and on-premises management costs.

Azure Virtual Desktop Features

Empower your employees to work securely from anywhere, at any time.

Azure Virtual Desktop offers users access to a virtualised Windows 10 desktop, Microsoft 365 Apps* and Microsoft Teams on any device.

Azure Virtual Desktop Service Tiers

| Feature | Overview | Essential | Advanced |
|---|--|---|---|
| Azure Virtual Desktop – Infrastructure Setup and Configuration | Setup and configuration of your Azure Virtual Desktop environment to the Windows 10 operating system level, including the installation of specific third-party applications. |  |  |
| OS Quality Updates | Quality updates are automatically installed and updated monthly (if available), ensuring the most up-to-date service. |  |  |
| Managed Anti-Virus | Protects against advanced threats, ransomware and real-time phishing. |  |  |
| Platform and OS Support | Management of Azure Virtual Desktop and the OS. |  |  |
| F5Logix User Profile Backup | A daily, automated backup schedule of F5Logix user profiles. | |  |
| Gold Image Backup | A backup of the templates for virtual machines (VM), virtual desktop, server or hard disk drives, ensuring business continuity. | |  |
| Automated Disaster Recovery | Runbooks are created for automated replication and disaster recovery of your Azure Virtual Desktop service. | |  |

*Customers will need Microsoft 365 licenses to access the Microsoft 365 Apps and Microsoft Teams on Azure Virtual Desktop
