

# IOT FACILITY MANAGEMENT

Improve health and safety, conserve energy and reduce costs.

Six Degrees enables your organisation to implement IoT-driven, real-time facility management systems to improve health and safety, conserve energy and reduce costs.

- Enable fast, secure and safe access control into the workplace.
- Limit the risk of contamination through contactless receptions, temperature screening and real-time building occupancy management.
- Secure contactless access control to a wide variety of environments.
- Access in-depth reporting for due diligence and legislative compliance.

## How IoT Facility Management Works

## Easy to Screen and Protect

- Six Degrees provides the necessary hardware, sensors, support and dashboard analytics to track building occupancy and movement.
- Six Degrees provides guidance on digital transformation strategies around secure cloud adoption and migration.
- IoT Facility Management is charged through a straightforward monthly pricing model and is fully-managed by Six Degrees.
