

# Six Degrees Regulatory Data Management Solution for MiFID II and beyond

Capture, encrypt, store and recall any type of multimedia communication data in a single pane of glass hierarchical view, all in real time.

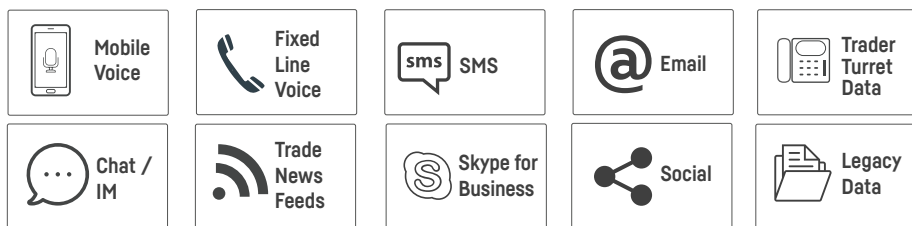

## What is our Regulatory Data Management Solution (Soteria™)?

Fully managed, modular and scalable, Soteria™ (powered by Insightful Technology), is a cost-effective, out of the box data management solution. It enables all digital and multimedia communications to be securely captured, analysed and stored in real time, in a structured way, coming directly from source systems, driving global compliance and enterprise agility.

Recalling and presenting all data for analysis in a single pane of glass view, Soteria™ drives efficiency. With it, businesses are also able to respond to a case reconstruction request within a matter of minutes, without any data leaving your jurisdiction.

## Scalable and cost-effective for any size business

A flexible pay per user, per month model allows Soteria™ to meet any SME or Large Enterprise's data capture, compliance and efficiency requirements. No extra licence fees or storage costs either.

## Take Control of Your Communications

- Manage your retention policies for multiple data types individually or for all data types for a specific employee.
- Adapt to meet changes in their organisation policies or relevant legal or regulatory changes.
- Reconstruct case files from all data within 24 hours when required.
- Data compression and archiving in accordance with your retention policies, while maintaining full searchability.
- Manage everything from any location using our intuitive central administration centre.

**Don't just be compliant,  
Be efficient!**

Soteria™ services 9 of the top 12 global banks for:

- MiFID II
- GDPR
- MAR
- Dodd-Frank
- and more!

## Stay Compliant Globally

Soteria™ is designed to enable compliance with:

- BSI BIP 0008 - A Code of Practice on the Legal Admissibility of Information Stored in Electronic Document Management Systems
- ISO TR 15801 Electronic imaging - Information stored electronically
- BSI DISC PD 5000 - An international code of good practice in five parts for electronic documents and e-commerce transactions as legally admissible evidence
- Financial Supervisory Authority (Norway)
- Financial Conduct Authority (UK)
- Dodd-Frank Act (USA)
- MiFID II (EU)

## Key Features

Soteria™ gives you all of these features below and more:

<b>Real Time Capture</b>	Of any data type, at source, including 3 <sup>rd</sup> party market abuse software data.
<b>Full Data Encryption</b>	In addition to a digitally signed audit trail for all objects, in addition to user and system activity.
<b>Third Party Certification</b>	Of data providing a complete set of tamper-proof records for duty of care.
<b>Resilient Secure Storage</b>	In our ISO certified, Tier IV cloud or, alternatively, on premise, with no integration required.
<b>Archive</b>	To set retention policies based on any location and specified duration with end-of-life auto-deletion.
<b>Keyword Search and Retrieval</b>	Of all metadata and objects, as a powerful global lookup via a single pane of glass view.
<b>Built-in Permission Hierarchy</b>	To manage an individual user's view[s] of globally stored data.
<b>Immediate Case Reconstruction</b>	By collating data in a file for further analysis, with time-lapse password access.
<b>Legal Hold Data Protection</b>	To prevent auto-deletion of objects on "Legal Hold".

## Multi-channel data capture

Soteria™ can give you a single, secure view across multiple channels including:

- Fixed line and mobile voice
- SMS
- Email
- Social media, including Facebook, Twitter and LinkedIn
- Files and folders
- Video
- Webmail
- Skype for Business
- Instant messaging
- Trade feeds including Bloomberg and Reuters
