

# LOCAL AUTHORITY SOLUTIONS

**Local Authorities provide crucial public services that support residents throughout the UK. Often at the front line of public services, Local Authorities play a key role in enabling residents to do the things they need to do on a day-to-day basis.**

The introduction of transformational digital technologies can help Local Authorities provide better services to their residents, enabling them to meet residents' needs whilst protecting their privacy and delivering better value for money than outdated legacy systems.

How can your Local Authority deliver better connected resident services whilst achieving cost efficiencies and protecting data at all times?

## Achieve cost efficiencies

Address budget pressures and focus spending on efficient front-line services, ensuring you retain focus on the essential support you deliver to your residents.

- Reduce IT operating costs by aligning your infrastructure deployments to your financial and operational needs.
- Relieve management and resource burden, enabling more people to focus on delivering front-line services by outsourcing infrastructure management to a trusted technology partner.
- Pay only for what you use and reduce capital expenditure with secure, agile infrastructure services delivered in an operational expenditure model.

## Enhance social care

Enable residents and council people to be better connected, providing a single front door into council services and enabling front-line council people to be more productive.

- Transform your resident experience through secure smarter, faster technology solutions that enable your people to be at their very best, wherever they are.
- Host systems in a consolidated manner that facilitates streamlined, joined-up working with public sector-aligned hosting services.
- Enable your people to work closely together across all of your Local Authority locations with a robust, high performance network fabric.

### Achieve digital transformation

Transition to a digital world for both your people and your residents. Leverage the latest technology to empower your people and deliver brilliant services to your residents, through the most appropriate channels.

- Enable your people to remain effective whilst working remotely with seamless communication and collaboration services.
- Deliver resident services in the manner that works best for them, whether via social media, apps, your website or over the phone.
- Ensure your new digital world is secure, protecting sensitive resident data and maintaining control across your digital footprint.

### New agile ways of working

Realise capital and operational expenditure savings by reassessing Local Authority real estate and reducing associated building costs.

- Migrate your local infrastructures away from Local Authority offices through compliant, public sector-aligned colocation and cloud services.
- Ensure your people have access to the right tools, when and where they need them, by delivering optimal uptime, performance and availability for their key applications.

### Focus on what you do best

Ensure your people have the time and resource to focus on delivering brilliant resident services by relieving them of the burden of infrastructure management.

- Enhance your in-house team's skills with access to sector specialists backed up by significant technical capabilities.
- Transition away from cumbersome outsourced IT contracts, towards agile, commercially flexible partnership arrangements that maximise your IT spend.
