QUICK REFERENCE GUIDE- LOGO PRINTING SETUP

Printing a Logo on your receipts with CAP POS can be done using an Epson TM-T88II-IV or Logo compatible thermal printer.

CAP System Requirements:

CAP POS 2004 and Newer

Graphic Requirements:

1) Logo needs to be in Bitmap format. Ex: softwarelogo.bmp
2) Logo size must be 195 in width and 108 in length, or 195x108.
3) Logo must be 2-Color or Grayscale

Follow these steps to set the Logo to print:

1) Locate and select the Logo you wish to print.
2) Name the file as **Logo.bmp**
3) Save the file in the following Directory so that CAP POS recognizes it correctly:
   C:\Program Files\CAP folder
4) Now run a test transaction.
   This will verify that CAP POS can now print the desired logo.
5) Reprint your transaction to check for re-print consistency.

If you need help formatting a Logo, or setting it up after attempting these directions, please do not hesitate to call Tech Support at (817)560-7007.
