

PAX SP30 / MT30 /S300 EDC Devices

Units using PAX must be setup and configured before integration with Sellwise Software. The Units require 1 serial connection and 1 network connection. WIRELESS IS NOT SUPPORTED.

Notes:

Setup the Application on the BroadPos Gateway. Contact CAP or Pax for access to BroadPos.

Microsoft .Net 4.0 or higher must be installed

Install Pax Driver Software:

CAP Pro 8 <http://www.capretail.com/download/pax/PaxSetup16.zip>

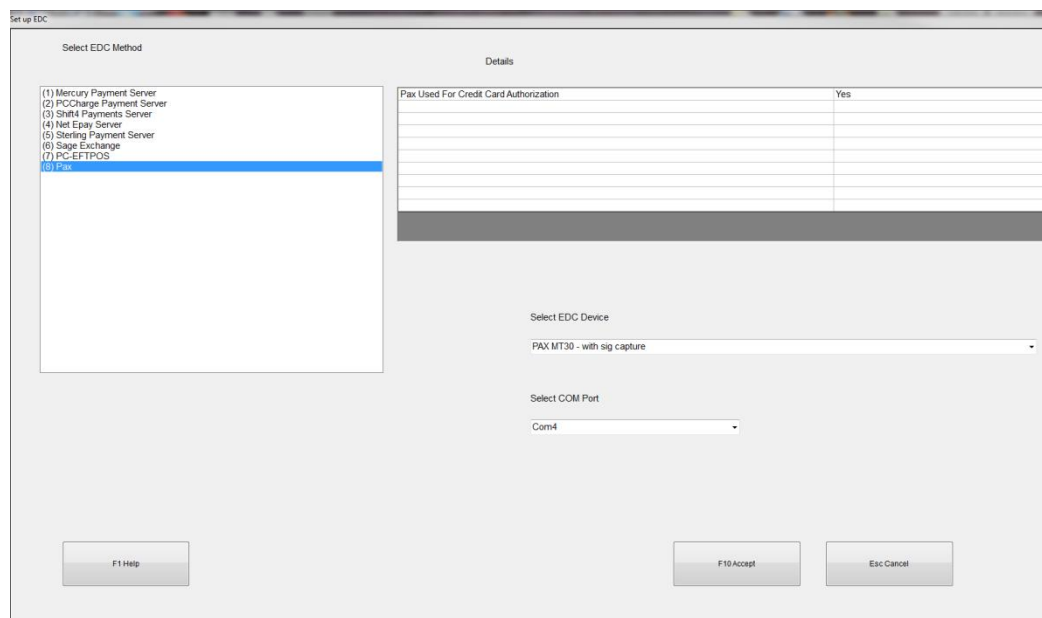

CAP Pro 9 <http://www.capretail.com/download/pax/PaxSetup124.zip>

Configure PAX in EDC

Set Pax Used for Credit Card Authorization to Yes

Select your EDC device

Set the proper Com Port

The screenshot shows the 'Set up EDC' window with the following sections:

- Select EDC Method:** A list of payment servers with 'Pax' selected at the bottom.
- Details:** A table with the following data:
