CognitivePG Label Printer DLXi
The Utilities, Drivers, and Documentation are located on the following website:

http://www.cognitivetpg.com/product/DLXi/downloads

Downloads:

1. Download and Install Driver

2. Download and Install CognitiveTPG Printer Administrator

The CognitiveTPG Printer Administrator requires Java.

Java Install and Configuration:

1. Install Java https://www.java.com/en/download/

2. Open Configure Java

3. Go to Security Tab

4. Exception Site List section, select 'Edit Site List'

5. Add http://jadmin.cognitive.com

6. Apply and OK

After installs and Java configuration, from the desktop, run CognitiveTPG Printer Administrator (or JAdmin.jnlp), if you receive

the Security Warning, accept the risk and run the application.

Printer settings can be found in the DLXi User Guide located on website.

Note: CognitiveTPG Media is recommended, however we successfully used media other than CognitiveTPG. Make sure the media is placed all the way to the left of the device over the paper sensor.
