

Process high volumes of documents quickly and effectively

Aluma's intelligent document processing solution offers organizations a fast and cost-effective way to automate document classification and data extraction in order to improve the accuracy and efficiency of high volume document processing, and subsequently deliver much higher margins.

Increase ROI with Intelligent, Automated Document Processing

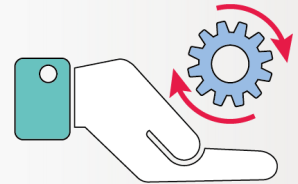

Automate Classification and Extraction

aluma.io automates document classification, and the subsequent extraction of data - increasing the speed and accuracy of processing, and the volume that can be processed with existing resources.

Add Value to your Existing Infrastructure

Rather than replacing your existing systems, aluma.io works in tandem with existing capture tools and processes, automatically enriching metadata to add value and remove costly human errors.

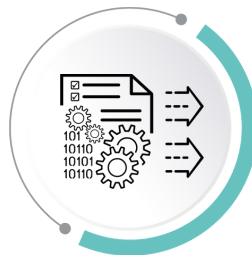

Minimize Business Disruption

aluma.io runs in parallel with your current processes, and can be rolled out without reliance on expensive technical expertise-no user training required.

Enrich your existing content as part of a business process

Automated document classification

Extended data extraction capabilities

Flexible, automated redaction

PII identification and content bookmarking

Integration to existing scanning hardware and capture software

Export image and data to file or direct to destination system
