

VSH TRANSPORT

VSH TRANSPORT is part of VSH United, one of the largest holding companies in Suriname, with subsidiaries in The Netherlands, Guyana and USA. VSH TRANSPORT wanted to change the way it operated its multi-cargo terminal to

increase efficiency. The discovery of oil in the Guyana-Suriname basin has brought new opportunities for VSH TRANSPORT, which also offers offshore support services, custom brokerage, integrated logistics, and warehousing. And although these two factors are unrelated, both events called for change and a readiness for whatever the future would bring.

Having IT Partner already as its software vendor of choice for the past decade, VSH TRANSPORT naturally turned to the company for solutions. This resulted in the successful

implementation of a full stack of CENTER SUITE products, a Terminal Operating System, a freight-forwarding module, and a graphical vessel- and yard- planning module.

Although IT Partner is able to perform remote implementations, the company chose to have a team on site in Suriname and one in the Netherlands. In this way, the company was able to have a maximum reduction in the downtime of the terminal, allowing VSH TRANSPORT to maintain excellent service for its customers.

VSH TRANSPORT is ready to face the challenges ahead. Now more than ever, it is imperative to be resilient and flexible. Organizations need to adapt to yet-unknown events, being able to seize opportunities as they come along, staying ahead of the competition.

ABOUT IT PARTNER

IT Partner was founded in 1999 in Rotterdam. IT Partner started as a software-developing company for customized solutions. In the last decade, IT Partner has been focusing on new tools and technology, redesigning its solutions into off-the-shelf products.

IT Partner has grown into a group of companies, the IT Partner Group. The IT Partner Group includes IT Partner, Caribbean Software Solutions (St. Maarten, Dutch West Indies) and VSH-Tech (including a Suriname office). IT Partner Group provides software solutions for the logistics industry and maritime sector. It supports ports, terminals, agencies, freight forwarders, stevedoring companies, warehouse companies and barge operators.

The Rotterdam Short Sea Terminal, which is the largest short sea terminal in Europe, and Port St. Maarten are among its impressive list of customers.

IT Partner Group works worldwide and provides support 24/7/365.
