MICRO.MAIN

Leading the maintenance management industry for over 30 years

Trusted by over 10,000 Customers

Investing in a CMMS helps you manage maintenance more effectively. Stay on top of work orders, track labor productivity, and extend asset life cycles with preventive maintenance. In other words, you'll significantly reduce maintenance costs while boosting productivity.

MicroMain.com   (512) 328 3235   sales@micromain.com

MicroMain's CMMS/EAM software is loaded with powerful features you'll love.

Work order management

Schedule work orders manually or automatically and track parts used and time on task. Easily add notes and attachments to each work order.

Predictive maintenance

Predict upcoming maintenance needs and address problems before they occur using trends data stored in the CMMS.

Preventive maintenance

Schedule work orders manually or automatically and track parts used and time on task. Easily add notes and attachments to each work order.

Asset management

Track and organize an unlimited number of assets. Quickly duplicate asset records with our special cloning feature.

QR code and barcode-enabled

Generate a unique QR code for each asset. When an asset needs repairs, simply scan its QR code to request a work order

Workforce tracking and management

Measure technician productivity and estimate the time needed to complete tasks using historical data of time spent on each task.

Parts & Inventory management

Automatically record changes in parts inventory levels. Reduce inventory carrying costs and receive alerts when quantity drops below a set minimum.

Downtime & Operating Schedule Tracking

Automate downtime tracking by leveraging Asset Operating Schedules. MicroMain will know the minute something is down in your operation.

Mobile maintenance

Manage maintenance on the go with our mobile app. You can even work offline to complete assigned tasks, such as recording time on tasks and parts used.

Integrations

Leverage MicroMain APIs and drive IoT connections by integrating with different systems such as ERP, Purchasing, Machines, SCADA, Production, and Facility Systems. If we don't have it, we can build it!

Additional Features

Customize your CMMS

- Single or multi-site configuration
- User role permissions
- Event, metering and alarm triggering
- Service request portal

Get real-time data insights

- KPI tracking
- Maintenance history reporting
- Equipment downtime reporting
- Intelligent analytics
- Integrated systems
- Integrated machinery (IoT)

Manage everything from one place

- Compliance and safety audits
- Document storage
- API for easy integrations
- Mass data import/export Image attachments for work orders

Free technical support and software upgrades

Have questions about how to optimize your software or just need to talk shop with an expert? Your subscription includes ongoing technical support and updates.

How do I implement my software?

We understand that software implementation can be complicated. At MicroMain, we handle the entire data import process and assist you in going live with your new CMMS, so you don't have to worry.
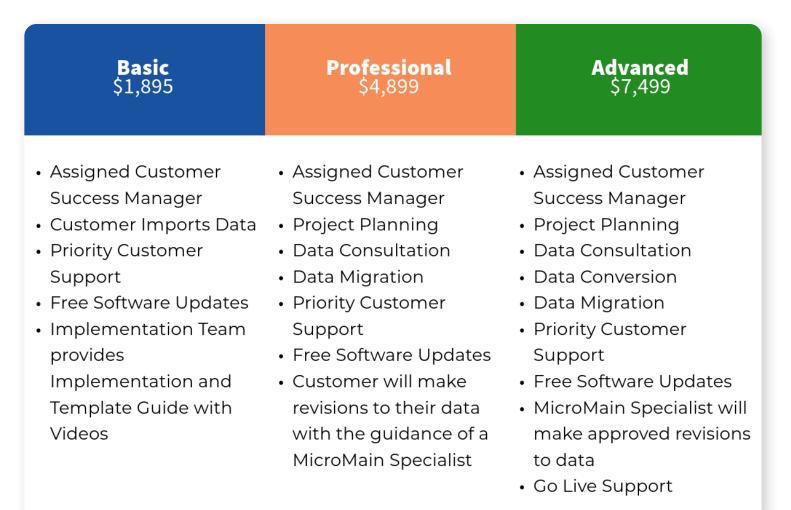

Prefer to migrate your data yourself? Our software includes a built-in data implementation tool to make the process easier. If you're switching from a different CMMS or dealing with messy data (as many organizations do), we can convert your data for you.

Here's how the process works:

1ST PHASE
BOOK A KICK-OFF CALL WITH US
Together, we'll establish expectations for the project plan, timelines, deliverables, and business requirements.

2ND PHASE
DATA IMPORT CONSULTATION
Enter your data into the Excel templates we've provided, and then a software specialist will determine the best method for data transfer and import.

3RD PHASE
REVIEW YOUR DATA
If you notice any errors or need to make changes to your data, we'll take care of them for you.

4TH PHASE
TRAINING & ADDITIONAL CONSULTATION
We'll train your team using a customized agenda based on your user roles, such as maintenance admin, planner, and others.

5TH PHASE
GO LIVE!
You're ready to go! The sky's the limit.

Choose from different tiers of software implementation, from basic help to more extensive guidance.

Importing your data is a crucial process that affects how effective your CMMS will be. We can help you convert and transfer your data from a third-party system to our CMMS, or you can choose to do it yourself.

Basic $1,895	Professional $4,899	Advanced $7,499

Pricing

When you use MicroMain Global, you only pay for what you need. We charge based on the number of admins and technicians using the platform. All software upgrades and customer support services are included at no extra cost. If you don't use all your logins, just let us know, and we'll adjust your bill in the next billing cycle. You'll receive one invoice from us each year—simple and straightforward!

Starting at $49 per technician license per month.
