

To deliver the highest quality guest experience, craft brewers and brewery operators need a POS system that helps. With GoTab, operators can have a sales system that gives guests the freedom and independence to choose how they want to order and pay. We offer distinctive solutions to optimize the systems you already have in place and alleviate your limited staff, putting the power back in the guests' hands with contactless ordering and digital tabs.

### Put It On The Tab

Open multiple digital tabs from the same table, meaning you can host big parties and give guests the option to either start their own tab or join in on an existing one.

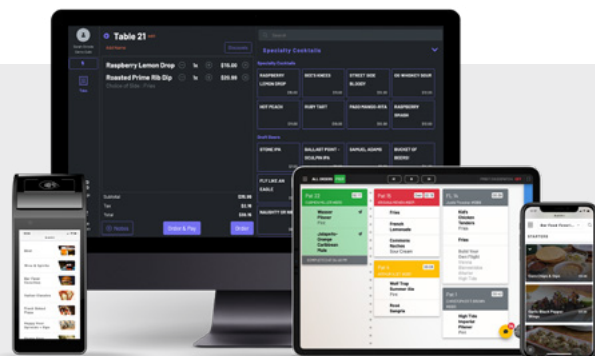

### Happy Staff, Happy Guests

With the ability for guests to order from their phones and have a faster service, servers can focus more on upselling, increasing table touches and in return receive higher tips.

### Always There

Keep your guests informed with two-way SMS text communication. Respond to issues that may arise in real-time.

### The Impact:

- 20% Higher Tips
- 35% – 50% Higher Check Averages
- 25% Faster Table Turns
- 30% – 50% Increased Labor Efficiency

## Low-Cost, Durable, In-Stock Hardware

### Kitchen Display System

Streamlines order fulfillment by automatically sending items to the correct station and facilitates the communication between kitchen staff and guests.

### Hand-Held Ordering Tablet

Enables your team to have on-the-go ordering power creating a seamless interaction between guests and servers.

### Pay-at-Table Terminal

Allows the servers to go directly to the guest to close a tab, making for a quicker interaction.

When you're going to 100% digital ordering on premise, you not only made it better for the customer, that now does not have to get up and wait and wonder if they can get a server, they can. So you get more incremental revenue, they get a better experience, and in the process you're changing your labor model. You're getting better throughout.

— Gregg Frazer,  
VP of Operations for  
Stone Brewing
