Fund Strategy

Portfolio Description – A diversified portfolio of securities across both defensive/income-oriented assets, such as cash and fixed interest securities, and growth assets such as Australian equities, property and international equities. The mix of defensive and growth assets and the allocation between defensive and growth assets will vary according to market conditions.

Investment Objective – The P.A.C. Conservative Portfolio aims to achieve a moderate amount of capital growth along with some income by investing in a diversified portfolio of growth and defensive assets.

Performance Objective – to exceed the Morningstar Aus Multi-Sector Conservative TR Index (AUD).

Portfolio Weights

- International Shares 26.39%
- International Fixed Interest 24.49%
- Australian Fixed Interest 23.71%
- Australian Shares 7.55%
- Cash 7.48%
- Australian Listed Property 5.31%
- Alternatives 5.08%

Fund Performance

International markets rallied through October despite a continuation of some worrisome issues including defaults in China's property sector, rising energy prices, and forthcoming central bank tapering. Our overarching expectation through October differed slightly from consensus in that we believed that supply dislocations and inflationary concerns were already priced in and the magnitude and longevity of their impact was overstated.

Consequently, we positioned the multi-asset funds towards technology with a slight overweight to international equities and entirely avoided emerging market equities. We believed U.S. large-cap technology would be largely sheltered from supply dislocations as they primarily sell digital goods and services.

At the tail end of the month the RBA lost control of its yield policy causing a sharp decline in Australian Fixed Income, highlighting how interest rate changes can have drastic effects on security prices even when expected. We believe that managing the multi-asset portfolios through tapering activities will be central to their success through 2021 and 2022.
