Fund Strategy

Portfolio Description – A diversified portfolio of securities across both defensive/income-oriented assets, such as cash and fixed interest securities, and growth assets such as Australian equities, property and international equities. The mix of defensive and growth assets and the allocation between defensive and growth assets will vary according to market conditions.

Investment Objective – The P.A.C. Conservative Portfolio aims to achieve a moderate amount of capital growth along with some income by investing in a diversified portfolio of growth and defensive assets.

Performance Objective – to exceed the Morningstar Aus Multi-Sector Conservative TR Index (AUD).

Fund Performance

September was a turbulent month, resulting in widespread under-performance from global markets. We attribute this to the confluence of concerns relating to (i) Evergrande and China's property/construction market; (ii) an unfolding energy crisis throughout Europe; and (iii) US debt ceiling and infrastructure policies.

P.A.C. Capital Conservative Portfolio returned -1.98% in September. The portfolio underperformed its benchmark due to an overweight exposure to the lagging Australian dollar, an overweight position in global equities relative to Australian equities and an underweight position in cash. On a positive front, our decision to only invest in Emerging Markets actively (rather than through our default strategic asset allocation), was vindicated by the looming Evergrande crisis, with the MSCI Emerging Markets Index down ~3% in September.
