Fund Strategy

Portfolio Description – A diversified portfolio of securities across both defensive/income-oriented assets such as cash and fixed interest securities and growth assets such as Australian equities, property and international equities with the emphasis on growth assets. The mix of defensive and growth assets and the allocation between defensive and growth assets will vary according to market conditions.

Investment Objective – The P.A.C. Growth Portfolio aims to achieve growth through investing in a diversified portfolio of growth and defensive asset classes a moderate exposure to defensive asset classes.

Performance Objective – to exceed the Morningstar Aus Multi-Sector Growth TR Index (AUD).

Fund Performance

September was a turbulent month, resulting in widespread under-performance from global markets. We attribute this to the confluence of concerns relating to (i) Evergrande and China's property/construction market; (ii) an unfolding energy crisis throughout Europe; and (iii) US debt ceiling and infrastructure policies.

P.A.C. Capital Growth Portfolio returned -2.52% in September. The portfolio underperformed its benchmark due to an overweight exposure to the lagging Australian dollar, an overweight position in global equities relative to Australian equities and an underweight position in cash. On a positive front, our decision to only invest in Emerging Markets actively (rather than through our default strategic asset allocation), was vindicated by the looming Evergrande crisis, with the MSCI Emerging Markets Index down ~3% in September.
