CITRIX ADC HEALTH CHECK

HEALTH CHECK AND OPTIMIZATION

Assessing where you are and where you should be. Analyzing usage & optimizations.

01

Analysis of the ADC environment
Throughout remote-analysis of the ADC environment, our experts will collect and analyze the current state of your ADC health, ranging from the ADC system itself to Licensing, Security, Lifecycle management, Best-Practices, Optimizations.

Licensing ⊕ Best-Practices ⊕ Security ⊕ Lifecycle management ⊕ Optimal usage

02

Inclusive report
An inclusive report will be provided featuring an executive summary with Top-7 risks, explicit positive matches according to our recommendations, prioritization of the issues.

03

Remediations
Remediations will be added to the document with a short description and effort-scoping. License optimizations will also be displayed.

04

Milestone: Decision on solution
Now that you have all in your hands, you can decide with in-depth information which path to choose.

WHAT YOU GET

- **ADC Health Check** and prioritized recommendations
- Propositions on **remediations & optimizations**
- Identification of **license optimizations** and high-level **remediation plan**

Per Max. 1000 Lines or Max. 1 HA pairs
Fixed price: **3.966,67 € (excl. VAT)**

Per Max. 2000 Lines or Max. 2 HA pairs
Fixed price: **5.950,00 € (excl. VAT)**

CITRIX ADC HEALTH CHECK

TAKING THE NEXT STEPS

ANALYSE	DISCOVERY		MANAGE

Xpand Config Analyzer — **ADC Health Check** — **Quoting** — **Remediations** — **Managed Services**

AND   AND   OR

Findings
Inclusive report on the health check

High-Priority issues
Issues which form a high security risk or a SPOF

Average/Low Priority issues
Issues which form a lower risk or a sub-optimal configuration

DIY
We or your teams can execute

We can do it for you
We execute all optimization on your behalf

WHAT YOU GET

- Clear approach on the remediations, handling it as a project

- Quote on solving high priority issues

- Offer for managed services to guarantee continuous improvement

Duration and price will be defined based on the remediation(s) considered and the **size of the configuration**
