IT Asset Disposition Services

DMD Systems Recovery

DMD Systems Recovery, Inc. (DMD) provides IT Asset Disposition solutions adhering to the most rigorous environmental and security standards to deliver confidence for companies who value our world and their reputation. DMD works with hundreds of companies and public entities to securely destroy their data, decommission assets, and redeploy or re-market the equipment across IT categories including DataCenter, End User Compute, and Mobility.

Decommission

All activities associated with the physical removal of assets from production or their current environment.

Inventory Management

The counting and cataloging of each IT asset, then compared to various inventory lists or manifests.

Value Recovery

Redirecting the assets to their greatest functional purpose generating monetary value.

Logistics

The planning, packaging, and transportation of your IT assets to our secure facility.

Data Destruction

Eradication of data ensuring compliance with internal and external privacy and security standards.

Electronics Recycling

Zero landfill compliant demanufacturing to recycle raw components and materials.

DMD guarantees complete responsibility with the DMD Enterprise Agreement which generates predefined terms for all equipment in all locations, providing you a comprehensive outcome you and your company can rely on.

DMD is AAA NAID Certified for onsite and offsite data destruction. DMD maintains the R2 certification for electronic waste compliance. DMD protects you for compliance across HIPAA, SOX, PCI, GLBA, FCRA, and other associated state and federal laws.
