

IT Asset Disposition Services

DMD Recovery Systems utilizes six key services to generate tailored IT Asset Disposition Solutions for you. Solutions guaranteeing Compliance and adhering to the highest standards for our Environment and your Security, with a benefit for our Society.

We consider this our COMPLETE RESPONSIBILITY.

DECOMMISSION

All activities associated with the physical removal of assets from production or their current environment.

LOGISTICS

The planning, packaging, and transportation of your IT assets to our secure facility.

INVENTORY MANAGEMENT

The counting and cataloging of each IT asset, then compared to various inventory lists or manifests.

DATA DESTRUCTION

Eradication of data ensuring compliance with internal and external privacy and security standards.

VALUE RECOVERY

Redirecting the assets to their greatest functional purpose generating monetary value.

ELECTRONICS RECYCLING

Zero landfill compliant demanufacturing to recycle raw components and materials.

DMD guarantees complete responsibility with the DMD Enterprise Agreement which generates predefined terms for all equipment in all locations, providing you a comprehensive outcome you and your company can rely on.

DMD is AAA NAID Certified for onsite and offsite data destruction. DMD maintains the R2 certification for electronic waste compliance. DMD protects you for compliance across HIPAA, SOX, PCI, GLBA, FCRA, and other associated state and federal laws.
