

ITAD in a Box

ITAD in a Box is designed for your remote workforce. The program is simple: a prepaid box ships directly to your employee. A QR code with video instructions shows how to pack and ship the IT asset directly to DMD for ITAD services, and eliminates the complexity of collecting and organizing all devices in one location.

Added security is achieved with an optional thumb drive which contains our NIST 800-88r1 certified software that overwrites the data on the device before shipping. With this option, a thumb drive is included in the prepaid box.

1. Pre-paid Box Sent

2. Remote Wipe
(↑ Security Option)

3. Package Device

4. Ship Device

5. Receive Device

6. Data Destruction

DMD is AAA NAID Certified for onsite and offsite data destruction. DMD maintains the R2 certification for electronic waste compliance. DMD protects you for compliance across HIPAA, SOX, PCI, GLBA, FCRA, and other associated state and federal laws.
