

Network Video Recorder 360iQ for your business

ANALOG AND IP CAMERAS

****Do not power on the server until all connections have been made****

1. Connect the Power Cable to the Battery Backup.
2. Connect the VGA Cable to the display port. Then connect the other end of the VGA Cable to the monitor.
3. Connect the USB Cable to the Ethernet.
4. Connect the Yellow Patch Cable to the PoE Switch.
5. Power on your server.
6. Check your 360iQ app. You should now be able to view all of your cameras.
7. For issues, call [800-933-8388](tel:800-933-8388) or email support@dtiq.com.
