	Subway Surveillance Basic	Subway Surveillance Advanced	Summary
FEATURES			
Web Based Solution	●	●	Solution requires no plugins or installations to operate. It runs on any device with an internet connection.
Browser Based	●	●	Accessible via web browser.
Mac Platform	●	●	Solution runs on Apple devices.
Simple Connection	●	●	Solution does not require port forwarding.
Motion Detection	●	●	Solution uses artificial intelligence to record immediate or scheduled motion detection, including doors, safes, and more.
Shared Reports	●	●	Solution allows users to schedule and share reports with authorized users across multiple permission levels.
New Custom Reports	●	●	Solutions allows users to save custom reports that provide critical insights and enhance operational efficiency. Examples include reports that track Voids and Discounts.
Camera Agnostic	●	●	Solution can be used with any type of camera.
Video Auditing Programs	●	●	Solution includes outsourced video monitoring and auditing services that track custom KPIs.
Exception Reports	●	●	Solution includes reports that track business exceptions, including voids, speed-of-service violations, time-card violations, and more.
Mobile Application	●	●	Solution includes access to a fully functional mobile app that can be used on any device. Includes push notifications for live alerts.
Customizable Dashboard	●	●	Solution includes a centralized portal where customizable critical information from across the entire enterprise is displayed.
Video Analytics	●	●	Solution analyzes metrics like speed of service, bounce rate, and more through traffic counting.
Off Site Storage	●	●	Solution uploads and stores surveillance to DTiQ's secure cloud.
Occupancy Monitor	●	●	Solution analyzes occupancy levels in your location as well as speed of service.
Receipt Text Overlay	●	●	Receipt data is overlaid on video surveillance video.
SERVICES			
Warranty	●	●	Solution includes a best-in-class warranty that runs the length of the contract.
Customer Service	●	●	Solution includes unlimited access to 24/7/365 customer support for the length of the contract.
Training	●	●	Solution includes access to free system training for any authorized user throughout the duration of the contract.
Flexible Purchase Model	●	●	Solution includes purchasing options in addition to HaaS and SaaS subscription models.

# Subway Surveillance for IPC by DTiQ

## Pricing & Purchase Packages

Pricing will vary based on the operating system, server/DVR and total number of cameras at each of your locations. DTiQ's ordering portal will walk you through which sites are eligible for further discounted pricing and how to build your new Subway Surveillance package for each location.

### Exclusively priced subscription or purchase packages:

Purchase Package		Subscription Package	
Starting at		Starting at	
\$744	Equipment	\$99 down	Equipment & Advanced Software
\$16.67/mo	Basic Software*	\$67/mo	

\* add select features a la carte or upgrade to advanced software for +\$37/mo

**Locations operating on Windows 7** qualify for discounted equipment pricing. Look for email communications from DTiQ for more information:

Purchase Package		Subscription Package	
Starting at		Starting at	
\$400	Equipment	\$99 down	Equipment & Advanced Software
\$16.67/mo	Basic Software*	\$67/mo	

\* add select features a la carte or upgrade to advanced software for +\$37/mo

**Locations with compatible equipment** (specific server/DVR types) will not need to purchase new equipment and are able to migrate to the new Subway Surveillance for as little as \$16.67/month. [Start your order to learn if any of your sites are eligible!](#)
