Data Risk and Compliance

Service highlights

Ongoing monitoring and audits to maintain compliance and regulatory standards

Customised remediation plans. No two businesses are the same even within the same industry.

Data mapping, gap analysis, & data protection impact assessments (DPIA) to understand your data assets.

Data discovery, classification, retention and sharing management

Certification and audit prep. Preparation and planning are key to successful certification.

Overview

Organisations are experiencing a daunting rate of breaches, ransomware, and cyber attacks than ever before. Compliance is complicated and takes a special set of skills and tools to assess risk, monitor, and maintain. Working alongside CMI's security Operation Centre (SOC), our Data Protection and Compliance team works to integrate existing services into your compliance strategy. The evolving landscape of compliance requires businesses to be able to integrate changes into their core infrastructure, whilst at the same time remaining secure.

Introducing Managed Data Risk & Compliance

CMI's data risk and compliance team bring both expertise and pragmatic approaches to compliance. Using the latest tools they ensure you have complete visibility of data assets that enable you to make the right decisions in terms of how that is secured, shared, stored and retained. Our managed services ensure compliance is maintained from an IT security and regulatory perspective working with your key stakeholders.
Designed for organisations such as yours, CMI's risk and compliance services will help you focus on your business operations while leveraging our team's daily expertise; see us as an extension to your daily compliance operations.
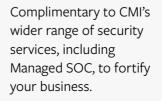

Why you should outsource Compliance

Conducting risk assessments is part of the core compliance measures mandated for many well-known regulations such as GDPR, ISO 27001, PCI-DSS, HIPAA and others. Given the volume, complexity, and speed of change, it is difficult to keep up with how best to satisfy your compliance responsibilities. CMI's compliance experts know and understand the tools available to ensure it is as non-disruptive as possible to your current business operations.

Competitive advantage. Your reputation grows when clients know you are doing your best to keep their data safe

Documented evidence of compliance so you can demonstrate your commitment to security and regulatory demands

Complimentary to CMI's wider range of security services, including Managed SOC, to fortify your business.

Manage due care for your cyber liability insurance. Avoid claim denials and reduce premiums.

05	**Monitor, Report, Remediate**
04	**Plan & Implement**
03	**DPIA & Design**
02	**MAP & Know your data**
01	**GAP & Discovery**

- GAP – What don't you know but need to know
- Ensure the data you hold is legally held
- Understand how data is collected, processed or managed

- DPIA's and design will help improve security
- Ongoing to maintain compliance
- Strategically plan for compliance changes

Who is this service for?

Every organisation needs compliance, to what level will depend on you, maybe you have:

- Done very little
- Lack skillsets / time
- A preference to outsource
- A need for a Data Protection Officer, (DPO)

- Like the peace of mind it is being looked after
- Can access an experienced team without the cost of hiring
- Must demonstrate robust security to meet compliance, regulatory, or key stakeholder demands

Why CMI?

We create, deliver and support secure modern workplace solutions that have a real positive impact to your business. That means reduced operational costs, happy productive staff, better customer service, less risk, more growth.

Technology that helps your staff do their best work, securely, anywhere.
