## 5 REASONS YOU NEED MOISTURE MEASUREMENT

### Why do we want to measure moisture in materials?

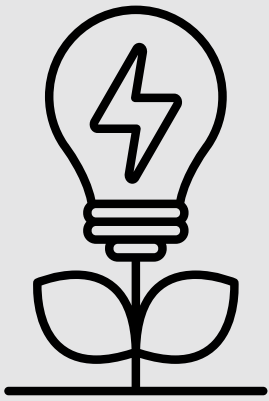

A large percentage of industrial processes are very similar in the respect that they blend and mix a variety of raw materials together to produce an end product.

1

### REDUCE COSTS

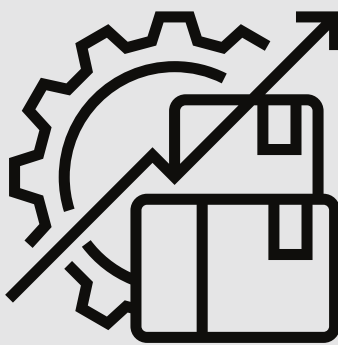

- Less spoiled material
- Optimise additives

2

### SAVE ENERGY

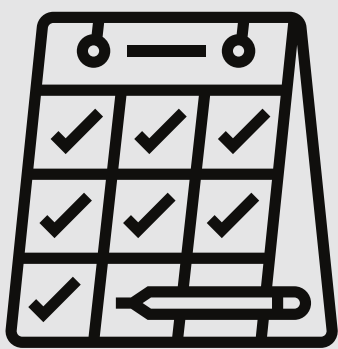

- Automatically adjust dryer heat
- Mixing for required time only

3

### INCREASE PRODUCTION

- Automate processes
- Reduce rework

4

### DELIVER CONSISTENT FINAL PRODUCT

- Hit moisture targets
- Continuous adjustment

5

### INCREASE COMPETITIVE ADVANTAGE

- Consistent final product quality
- Increase yield through efficient use of materials
