

Why choose Encrypted Fax for your business?

Privacy and security rules

Depending on your industry or industries that you deal with, you may need fax encryption, especially when dealing with personal information.

Compliance requirements

HIPAA, SOX, GLBA, PCI-DSS, PIPEDA, FERPA: if these are important to you, chances are you'll need fax encryption.

Corporate policy

Your corporate policy may dictate that you need an encrypted fax, especially when dealing with documents of a sensitive or highly classified nature.

Legality requirements

Fax is a legally accepted medium to submit contracts, agreements and other binding documents.
