## Food Grade and Sanitary Stainless Cyclones, Bin Vent Filters, Baghouses

Industrial Accessories Company, Mission, Kansas designs and builds all cyclones, bin vent filters, product receivers, nuisance baghouses, and process gas baghouses in its product line in optional stainless steel for sanitary and food grade applications.

IAC specializes in pneumatic conveying, dust collection and bulk material management systems. Stainless applications extend beyond air handling products to include bulk bag unloaders, bulk storage silos, pneumatic conveying equipment, sonic horns, airlocks, and other equipment required for a full material management system. IAC can furnish most all brands of sanitary couplings, clamps, ferrules, gaskets, fittings and tubing. Turnkey systems are available.
