

HD Video Recorder with DMS Technology

# DV6

Welcome to artificial intelligence at its most accurate  
**Powered by RoscoLive®**

# Keeping our roads safe for more than 100 years

In the last 20 years alone, we've ...

...enabling countless safety and liability savings.

Rosco is a leading global supplier of vision safety solutions to the bus and truck marketplace with over 110 years of engineering and manufacturing experience. Since 1907, Rosco has been headquartered in New York City, with products engineered, manufactured, and supported in the USA.

Today, Rosco remains the largest manufacturer of bus mirrors and vision technologies in North America and continues to develop cutting edge innovations for safer roads.

## Finally, a dashcam with actual intelligence

With our AI, driver management is more accurate than ever.

Are you tired of false positive events, or false negative losses of critical video you needed to see? Then let us introduce you to DV6...

Designed with security in mind, the next generation of Rosco's Dual-Vision® camera allows you to drive with confidence. The DV6 is a compact camera that employs smart security to protect your drivers.

Rosco's new DV6 captures and processes full HD footage of the driver and the road with local and cloud storage options. It generates in-cab alerts for drivers when risky behaviors are detected, and provides data for fleet managers to help monitor safety trends over time.

-  Continuous video and event recorder with laser focused accuracy to detect events like G-shock, speeding, driver panic button, and AI/DMS events of cellphone footage, drowsiness, and critical distraction.
-  128GB SD card standard local storage, scalable to 1TB and 2,000 hours maximum. Event videos transmitted to RoscoLive Cloud are stored for 1 year.
-  Internal modem and antenna for minimal clutter under the dash with less connections and tamper points.
-  Tested and proven by the most stringent, heavy-duty vehicle environmental vibration standards like SAE 31455-201703.
-  2 cameras integrated in a single horizontal housing for minimal forward view obstruction.
-  Full HD resolution cameras, both individually capable of 1080p or 720p with up to 30 FPS. Real time livestreaming from either lens to see the driver and the road ahead.
-  Tamperproof security fasteners to protect camera mounting angle to bracket, camera lens adjustment, and access panel with power connectors and SD card.  
*Translation—the most secure dash cam in the industry.*
-  OBD or J1939 connections for quick and simple install using Rosco's Installer app. (iOS and Android capable)

## Greater confidence for your drivers

### Your drivers will thank you.

With AI technology that helps to increase driver safety and minimize the risks of road collisions, the DV6 tracks drivers for instances of phone use, drowsiness, and other distractions. When this behavior is shown, the DV6 alerts the driver with an audible reminder chime. DMS alerts via SMS or email will also notify Fleet managers with footage available. As a result, fleet managers can coach drivers and improve the overall operational efficiency for their fleet.

## Another kind of AI: actual insights

### Smarter technology for the businesses that drive our world.

Rosco's algorithms ensure the Dual-Vision® camera is perfectly synced across all vehicles. By using Machine Vision, in-cab facial recognition technology links drivers with data — for everyone's safety. In turn, maximize productive alerts with Rosco's market-leading intelligence, proven to offer superior accuracy.

## Built for everyone, customized for you

### Making life on the road easier and safer for every fleet.

Focus only on what matters with intuitive, real-time notifications and analytics to help drivers and inform business decisions. Install each system quickly using our RoscoLive® installer app and keep your vehicles on the road with minimum down time. Lastly, zero maintenance! That's right: zero maintenance, we know you have more important things to do.

## Quick, simple installation and effortless maintenance with OTA updates.

### Installation is as easy as 1-2-3 with Rosco's new Installer App

Rosco's new Installer app (available for iOS and Android) cuts down install times and creates a seamless process. The DV6 is packaged with an internal modem and antenna allowing for the simplest hardware installation with one mounting point, and one camera to vehicle connection.

## Giving fleet managers the tools to reduce high-risk driving on the road with AI

### Fight fatigue and drowsiness

Long hours behind the wheel make drivers of trucks, emergency vehicles and passenger vehicles susceptible to fatigue. The Rosco DV6 uses AI to track the driver's eyes and head position for signs of tiredness (including yawning), issuing an audio alert when drowsiness kicks in.

### Shut out distractions

Distractions inside or outside the cab can lead to poor driver performance and accidents on the road. Potentially dangerous driver behaviors are monitored in real-time. Rosco's DV6 technology sends on-the-spot audio warnings with amazing accuracy to prompt corrective actions, then uploads videos to the cloud.

### Monitor phone usage

Phones and smartwatches are everywhere, but taking a phone call – or even a quick glance – while driving could have severe consequences. When the Rosco DV6 detects a driver holding a phone to their ear, it generates an audio alert to warn the driver.

### Send alerts & notifications

Not only will the DV6 generate an alert to warn the driver, it will send an instantaneous SMS or e-mail alert to management, allowing for instant interventions and livestreaming to get ahead of potential major issues.

## Transforming driver management with RoscoLive®

All the tools you need including crystal clear livestreaming from all camera lenses.

### Fully integrated with the DV6 dashcam

See videos of incidents just minutes after they occur, thanks to the automatic upload setting. RoscoLive® works with 4G LTE – fully tested and certified by Verizon, AT&T, T-Mobile, Bell, and more. RoscoLive® offers customizable datasets and reports on alerts, collisions, miles driven, speeding, fuel consumption and driver scores.

### Cutting-edge technology to future-proof your fleet

Improved user interface of RoscoLive® offers new experience with GPS tracking, live streaming video and customized reporting. See where all of your vehicles are in real time, using a single interface with full Google Maps functionality. RoscoLive® allows you to watch and flag incident footage, stream video live from a vehicle, or share and download recordings.

### Support and protection for drivers

Powered by RoscoLive®, our new driver monitoring area allows you to link driver IDs to specific routes, vehicles and events – helping you target training where it's needed, set goals for individuals and teams, and ensure the safety and security of people and cargo.

# Seamless integration, courtesy of Rosco

Manage your fleet, monitor your drivers and keep your focus on the road ahead.

The Rosco DV6 with RoscoLive® works seamlessly with many technology service providers. Want to know more? Our integration with Geotab makes for a perfect case study.

Meet Geotab, a powerful telematics tool for fleet management – and one of our largest integration partners. Rosco video footage adds a new dimension to your Geotab data and reporting.

Rosco's DV+RoscoLive® add-in is a truly seamless integration that adds the power of video to crucial data, all within the myGeotab interface. When an Exception occurs, it's easier than ever for fleet managers to find out not just what happened, but why.

## Protecting more than 1,000 fleets across America.

Proud to be a Tier 1 supplier to North America's top vehicle manufacturers and fleets.

Our safety products make Rosco the manufacturing partner of choice for more than 1,000 commercial fleets – trucks, buses, purpose-built and last mile delivery vehicles, emergency & rescue, off-road and more – all across North America and growing worldwide.
