

Roofing-Element Assessment Packages

At Macutex, we understand companies need to know the total condition of the buildings they manage.

Macutex now offers three dedicated Roofing-Element Assessment Packages, tailored to suit your specific needs and budget.

Missing roof asset data can now be safely, efficiently and cost-effectively captured using drone technology. Our packages are designed to help companies fill the gaps in their datasets, and make confident, informed decisions about their assets.

We are your trusted partner to manage your roofing assets better.

- In-house company CASA licenced Remote Operators Certificate (ReOC – No.1348), and Chief Pilot
- A team of in-house CASA licenced Remote Pilots (RePL)
- Comprehensive flight risk and safety management systems
- Fully insured for flight operations undertaken
